

TOWARDS REVIVAL OF BIOCHEMICAL SOCIETY OF KENYA (BSK)

On Friday 26th January 2018, there was a very exciting and successful consultative meeting towards the revival of the once vibrant BSK. This meeting was hosted by the chairman of Biochemistry department and was attended by members from University of Nairobi, Jomo Kenyatta University of Agriculture and Technology, South Eastern Kenya University, Cooperative University of Kenya, Technical University of Kenya, Kabarak University, ICIPE and KALRO. We appreciate all the members who turned up and those who registered their apologies. It came out strongly that we must have a very Vibrant and reenergized professional Association in place as soon as possible. A team has been tasked to follow and report on the legal status of BSK within a week as well as find or come up with a draft constitution and develop a strategic within a month. Institutional champions were proposed and names will be circulated. Expect several important and exciting activities in 2018. Member recruitment will commence as soon as the Association is legally in place. Detailed minutes will be circulated in the coming week. Take home message "Each one of us should actively participate and support BSK's revival now more than ever".
